

Overview: Hygienic Cooling Systems

We understand the importance of environments within the Food industry, so can advise you on the best type of cooling equipment to use. We design, manufacture and install bespoke cooling systems to suit your individual needs.

As standard we offer:

- Free site visits to assess your needs
- Designed, manufactured & installed to your requirements
- Fast, efficient installations by our experienced site team
- Full after sales service & maintenance package

We have worked within the food industry for many years and can help advise on the best solution for your needs. Systems can be sized, designed and built to suit your needs - all in the UK using high quality materials.

We supply JLC single or double coolers which can be floor, ceiling or wall mounted to minimise required space and are fully hygienic and easy to dismantle for cleaning.

Systems can be fully automated and we work with LivEarth Electrical Contractors to provide a complete service to our customers from design and manufacture to installation and maintenance.

Please call us to discuss your requirements further.
